**Slow Learners**  
**Report -2023-2024**

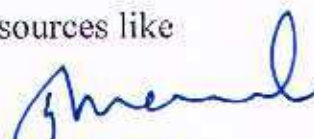

Within the classrooms teachers have to interact the different types of students; some are very intelligent and some are quite weak. Teachers get many experiences while teaching. Some students learn very fast and some students learn slowly. Some students need only guidance and some students need a hard work and regular attention. Generally, on the basis of their learning speed we can classify them. During the academic year 2023-24 the slow learners of in the subject of Financial Accounting, Business Communication, Auditing & Taxation were identified and programmes were organised for them. The slow learner students were identified and selected on the basis of those who were fail and got lower mark and passing marks in Internal and External Examination held in both semesters.

Student who was selected as slow learners were given extra lectures to improving academic skills & clearing the confusions of the students in particular subject. His academic progress was developed by taking this extra lecture for his overall progress in a particular subject.

**Activities for Slow learners.**

1. Compensatory teaching.
2. Remedial teaching.
3. Providing peer tutoring by high ability classmates.
4. Encouraging them to articulate orally in the class & providing more chances for classroom participation.
5. Teaching learning skills such as note-taking, outlining, and active listening.
6. Mentoring by faculty mentors.
7. Encouraging them to spend more time on reading in libraries outside the class hours.
8. Additional learning opportunities though online sources like YouTube, WhatsApp, etc.

In the academic year 2023-24, the students admitted to the Special English and compulsory subjects, were very poor in learning. So, a separate list was prepared for slow learners students. Extra attention was given to these students during the year. The marks secured by such students were verified after taking the internal assessment test. Such students scored low marks in the internal assessment test. For their best performance in subjects which were secured low marks, they were given books for study during the year. They were shown various educational videos through YouTube. Some students were given individual homework. During the year they studied by giving them various homework and activities.

The students were guided by the teachers for study in the poor performance subjects. They were inspired by activities like group discussion and informal conversation. Overall, these students interestedly faced the university examination. These students got good marks in semester end examination than internal examination. The slow-learner students successfully updated their performance after good guidance.
